EXPERIENCE

Meta , <i>Research Scientist Intern</i> • London, UK	<i>Jun - Dec 2025</i>
• Manager: Akhil Mathur. Team: Post-training Reasoning, Agents.	
Cohere , <i>Research Intern</i> • London, UK	<i>Jun - Dec 2024</i>
• Manager: Max Bartolo. Team: Command Post-training. • Developed a reinforcement learning pipeline for reverse engineering human preferences that boosts LLM-as-a-judge evaluation. • Investigated implicit learning from mistakes, showing LLMs attain higher accuracy when not shown explicit corrective feedback. • Completed two distinct research projects at the same time, resulting in first-author papers at NeurIPS and EMNLP respectively.	
Google , <i>Research Intern</i> • Amsterdam, Netherlands	<i>Jun - Sep 2023</i>
• Manager: Thomas Mensink. Team: Perception. • Developed a model-ensembling framework for knowledge-intensive VQA that beats SOTA by 5% on Encyclopedic-VQA. • Presented the resulting publication at ICBINB at NeurIPS 2023.	
Google , <i>Student Researcher</i> • London, UK <i>Research Intern</i> • Zurich, Switzerland	<i>Oct - Dec 2022</i> <i>Jun - Sep 2022</i>
• Manager: Hamza Harkous. Team: Applied Privacy Research. • Developed a new pipeline for retrieval-augmented generation of user issues that was deployed to production. • Improved recall of existing issues by 10x over the previous model, with comparable semantic accuracy for new issue generation. • Granted a global patent as co-inventor of the overall system for navigating user feedback.
