EXPERIENCE

Allen Institute for AI (AI2) , (<i>Incoming</i>) <i>Research Intern</i> • Seattle, USA	Jun - Sep 2026
Manager: Varsha Kishore. Team: Asta – AI for Science.	
Meta , <i>Research Scientist Intern</i> • London, UK	Jun - Dec 2025
- Manager: Akhil Mathur. Team: Post-training Reasoning, Agents. - Studied how LLM agent capabilities scale as a function of FLOPs and completion time horizon. - Designed a marketplace-inspired adaptive multi-agent system that coordinates small agents to push the accuracy/cost Pareto frontier. - Work resulted in a first-author paper at ICML 2026.	
Cohere , <i>Research Intern</i> • London, UK	Jun - Dec 2024
- Manager: Max Bartolo. Team: Command Post-training. - Developed a reinforcement learning pipeline for reverse engineering human preferences that boosts LLM-as-a-judge evaluation. - Investigated implicit learning from mistakes, showing LLMs attain higher accuracy when not shown explicit corrective feedback. - Completed two distinct research projects at the same time, resulting in first-author papers at NeurIPS and EMNLP respectively.	
Google , <i>Research Intern</i> • Amsterdam, Netherlands	Jun - Sep 2023
- Manager: Thomas Mensink. Team: Perception. - Developed a model-ensembling framework for knowledge-intensive VQA that beats SOTA by 5% on Encyclopedic-VQA. - Presented the resulting publication at ICBINB at NeurIPS 2023, with paper published in PMLR.	
Google , <i>Student Researcher</i> • London, UK	Oct - Dec 2022
<i>Research Intern</i> • Zurich, Switzerland	Jun - Sep 2022
- Manager: Hamza Harkous. Team: Applied Privacy Research. - Developed a new pipeline for retrieval-augmented generation of user issues that was deployed to production. - Improved recall of existing issues by 10× over the previous model, with comparable semantic accuracy for new issue generation. - Granted a global patent as co-inventor of the overall system for navigating user feedback.
